TLB Camp Policies

BELONGINGS

- * All summer campers should WEAR their bathing suit under their play clothes every day. Even if they tell you they don't want to go in the water. They might not want to go in the sprinklers but we might play water games, play at the water table or your child might change their mind. If it is raining, it might clear up by the time we go outside so please put on those suits! It will significantly delay our schedule when our campers have to change at camp.
- * Apply sunblock AND bug spray before camp. We spend a lot of time outdoors.
- * Label all belongings with your camper's name.
- * No stuffed animals or toys from home.
- * Your camper must wear closed toe, rubber soled shoes to camp. **No flip flops or sandals.**
- * Your camper needs water shoes to play in the sprinkler park. It is a Lincoln Park policy.

FOOD

- * Pack your camper's lunch and snacks in a lunch box. Make sure to label EVERYTHING.
- * Do not pack your snack or lunch in a plastic bag.

BIRTHDAY CELEBRATIONS

Birthdays are a special time and we love to celebrate them with our campers! For campers who have birthdays during the camp session, you are welcome to send in a small nut free treat (mini-cupcakes, mini-muffins, small cookies, cut fruit, etc.) to share with their friends. Talk to your Head Counselor about when you would like to send a treat and we can let you know how many campers are in your child's group.

SICK

If your camper is not feeling well in the morning (has a fever of 100 degrees F or higher, vomiting, diarrhea, yellow mucus, etc.) in fairness to other campers, PLEASE keep them home. It is better to come to camp late because they are feeling better than have to go home because their symptoms do not improve. If your camper needs to be picked up early due to illness, we will keep them as comfortable as possible in the wellness center until you arrive. For the well being of our healthy campers, ill campers do need to be picked up under the following circumstances:

- If your camper develops a fever of 100 degrees F or higher
- If your camper vomits at camp
- General condition of your camper at the discretion of the Health Director is such that they are unable to return to their normal camp activities

We realize that our campers don't want to miss a day of camp, however, we want to minimize the possibility of getting our fellow campers and counselors ill and in turn causing them to miss camp. Campers MUST be fever free (below 100 degrees F, without fever reducing medication) for 24 hours before returning to camp. This will help prevent the further spread of illness.

LICE

Anyone can get head lice—mainly through direct head-to-head contact, but also from sharing hats, brushes and other personal items. Head lice are an issue in many communities and do not reflect poor hygiene (lice actually love a clean head of hair!) or socio-economic status. Please do your part to prevent the spread of this communicable condition by checking your child(ren) regularly. We check all campers the Monday of each new session and will contact you immediately if we spot lice. It is much easier to treat if caught early. If you should discover your child has head lice, please notify us **immediately** and **keep your camper home until they have been treated and DO NOT have live lice**. Please contact a trusted medical provider if you need recommendation on how to best treat it. This is the best way to protect your family and community. If you need further information you can read about head lice on the [CDC website](http://www.cdc.gov/nczod/dzdx/lsc/lsc.html) or the [American Academy of Pediatrics](http://www.aap.org).

TICKS

Ticks are part of our natural world and have become more prevalent in Jersey City parks and outdoor areas. We know that children and adults can be exposed to ticks anywhere in nature, whether it is a backyard, a park, or a hiking trail. It is our intention to raise awareness about how to prevent tick related illnesses in general and not to cause you alarm. Bug spray will keep ticks away so please add bug spray to your morning routine. The best way to prevent any illness caused by a tick is to perform a quick and easy body check during evening bath or bedtime. Pay close attention to waistlines, groin, under arms, behind knees, ears and around the hairline. A tick bite in itself does not cause infection. In order to transmit a disease, a tick would need to be attached for at least 24 hours, which is why daily tick checks are so effective. For tips on proper tick removal and additional information, check the CDC's website: http://www.cdc.gov/ticks/removing_a_tick.html
