

Preschool * Kindergarten * Elementary tlb after 3: afterschool fun

691 West Side Avenue
Jersey City, NJ

Our students experience the joy of *real* play-based, thematic education in our preschool and project-based, thematic education in our elementary school. It's not just about what they are learning but also about *how* they learn. We really listen to our students, and nurture and encourage their curiosity with engaging workshops. By doing this, we are helping to create strong, confident, creative members and future leaders of our community. Our curriculum is not something that is rigid. It is playful, flexible and open-ended. It continues to grow as our students and teachers live and work it. Our teachers set up the creative environment with opportunities for students to touch, listen, see, experiment, discuss and role-play the many aspects of an idea. This gives us the opportunity to explore, expand and bring real meaning to the questions of our students.

"It's the things we play with and the people who help us play that make a great difference in our lives." Fred Rogers

We strive to strengthen the home-school connection through use of multiple tools such as daily **Brightwheel** pictures, our weekly blog – **the nest**, and monthly **family-fun events!**

Our doors are **always** open to our families, so come visit us!

Our West Side JC school starts with our Preschool Program and will add elementary grades every year. We also offer an amazing afterschool program **TLB after 3** which includes outside time in Lincoln Park, play time in our super fun play rooms, homework help and add on specialty creative arts classes, like sewing, gymnastics, dance, art, and musical theater.

FLY WITH US AND DISCOVER... PRESCHOOL

At *three little birds'* preschool, we are dedicated to providing exceptional play-based, thematic education. We believe, and research supports, that children learn best through **play**. Our programs focus on guiding children, along with their families, to develop the social, emotional, physical and academic skills needed to succeed in elementary school and beyond.

2.5 & 3S

Our play-based, thematic program prepares children for school by easing them into a routine, while giving them the room to express themselves and discover the joy of learning!

Our classroom provides opportunities to explore developmentally appropriate learning centers dedicated to literacy, art, sensory exploration, construction/blocks, math and dramatic/creative play.

In addition to our centers, we have a cozy, peaceful area for our students to engage in quiet, independent activities or to just refresh and recharge.

Daily activities will include:

- * Circle and story times
- * Free play in our learning centers
- * Outdoor play in the amazing Lincoln Park
- * Rotating music, creative art and movement classes

4S

Our beautiful learning environment will inspire children to connect with their world in new and challenging ways. This class will build upon and enhance previously learned skills and development. We foster an enjoyable, pressure-free environment, where curiosity and learning can flourish in our developmentally appropriate learning centers, workshops and creative arts activities.

Our highly skilled and passionate teachers will focus on:

- * expanding our students' world through cultural studies, science, and nature workshops
- * building the foundations of academic learning in reading, writing and math through our workshops
- * the development of social skills and leadership
- * play in our learning centers: dramatic play, art/writing, language arts, construction/blocks/engineering, science, math, reading PLUS... our students have daily outdoor play in Lincoln Park and weekly movement, art, music, yoga and Spanish classes

Our nurturing teachers truly connect with our young students to develop their language, independence, social-emotional skills and self-confidence to engage in the world around them.

FLY WITH US AND DISCOVER... **ELEMENTARY**

Our elementary students will be exposed to more in-depth, project-based workshops that will help strengthen their focus, critical thinking, collaboration and their ability to problem solve. They will also gain the confidence to work both independently and with their classmates. Our school will meet state standards but our approach will be engaging, creative and cooperative with a focus on the arts and outdoors. They will participate in our daily Teacher's College Readers, Writers and Phonics workshops. The students will also start more in depth math workshops according to their grade level. Students will continue to learn about their world through science and cultural studies weekly workshops as well as community service events. We will also be exposing children to weekly health, fitness and teambuilding workshops. Our students have daily outdoor play and exploration in Lincoln Park and weekly movement, art, music, yoga and Spanish classes. Our program continues to focus on the development of a creative mind, balanced with academic growth based on our commitment to prepare our students for both for future grades and life beyond the classroom.
